RÉMI MIALON–EVAN

Mobile Engineer — Android Technical Lead / Kotlin

Grenoble, France · remi.mialonevan@gmail.com · linkedin.com/in/rémi-mialonevan-b0a388174 · github.com/Wardmisp

French national · Eligible to work in Norway/EEA under the EU-EEA free movement agreement · Open to relocation to Norway or another Nordic country

PROFILE

Mobile Engineer with 4+ years of experience in Android/Kotlin and iOS development, currently Android Technical Lead, having built solutions used by several hundred thousand users. Strong background in Clean Architecture, SOLID principles and Kotlin Multiplatform, combined with Machine Learning/Data expertise (IBM specialization, OpenAI Realtime API voice agent, internal Llama + RAG chatbot). Author of a full-featured React Native library covering the entire product lifecycle. Looking for an Android/Kotlin Developer or Mobile Engineer role in Norway or another Nordic country.

TECHNICAL SKILLS

Languages: Kotlin, Java, Swift, JavaScript/TypeScript, SQL, C++, Python

Mobile: Android SDK, Jetpack Compose, Clean Architecture, MVVM, Room, Hilt, React Native, Kotlin Multiplatform (KMP), iOS/Swift

AI & Data: Machine Learning, LLM, RAG, OpenAI Realtime API (Speech-to-Speech), Llama, Data Analysis, TensorFlow Lite

Tools & Methods: Git/GitLab, GitLab CI/CD, Supabase, Agile (Scrum, Kanban), Jira, unit/automated testing

Other: Unreal Engine (C++, Blueprint), Virtual Reality (Oculus Quest 2)

PROFESSIONAL EXPERIENCE

Mobile Application Developer — Android Technical Lead — Alpes Contrôles — Since March 2026

- Android Technical Lead: owner of architecture decisions and best practices (Clean Architecture, SOLID principles) across the mobile scope.
- Implemented a conversational voice agent based on the OpenAI Realtime API (Speech-to-Speech), enhancing in-app assistance and user experience.
- Diagnosed and fixed memory leaks, improving the stability and performance of the production application.
- Migrated several internal libraries to Jetpack Compose, in line with Clean Architecture and SOLID principles.
- Set up and maintained CI/CD delivery pipelines using GitLab CI.

Software Engineer — Visioglobe — Oct. 2022 – Dec. 2025 (3 yrs 3 mos)

- Developed and maintained an Android indoor-navigation library, deployed at 30+ international clients, including Miami and Doha airports.
- Handled technical follow-up and bug fixing on production Android/iOS applications, ensuring stability and reliability for end users.
- Designed and maintained a full-featured React Native library (UI/UX, integration, testing, deployment), reused across several products in the portfolio, applying Clean Architecture and performance optimization.
- Contributed to improving Agile processes with R&D teams (introducing Kanban and Sprints), strengthening cross-team collaboration and delivery predictability.
- Built an internal chatbot based on the Llama model and a RAG architecture, streamlining access to information and reducing search time for internal teams.

Consultant Engineer — ALTEN — April 2021 – Aug. 2022 (1 yr 5 mos)

- Software and database testing assignment in SQL (test case design, data validation) — Boulogne-Billancourt.
- VR Developer: authentication system adapted for virtual reality on Oculus Quest 2, using Unreal Engine (C++, Blueprint) — Sèvres.

PERSONAL PROJECTS

Glorious Five — Android Application (github.com/Wardmisp)

- Android app in closed beta on the Play Store (Room for local storage, Supabase for multiplayer sync, Hilt for dependency injection), with a database of the 300 best NBA seasons built via Python scraping and PER + Win Shares scoring; planned evolution towards Kotlin Multiplatform.

EDUCATION

Engineering Degree, Big Data specialization — ECE Paris 2018 – 2021

Preparatory Classes for Grandes Écoles (CPGE MP) — Lycée Pothier 2016 – 2018

CERTIFICATIONS & LANGUAGES

- TOEFL — Score 98/120
- IBM Advanced Data Science Specialization (Coursera) — Machine Learning & Data Science Capstone

French: native · English: fluent (TOEFL 98/120) · German: basic (A2)
